

2019 Price List For Optional Planting Services:

Dear Customer;

In order to provide our best service to you, please complete and return the accompanying Service Order Form with your payment in the self-addressed envelope provided before May 10 (please do not mail cash). While planting does not commence until after May 25, we require your payment on time so that we can process all orders in time for planting. Orders received by May 10 are normally planted in time for Father's Day. Planting is scheduled to be complete by June 14. Late orders are subject to a \$12.43/garden surcharge and scheduled for planting between June 19 and 30. Each garden will be watered, weeded, and fertilized throughout June, July and August. Flowers may be removed following damaging frost or after October 14. We are unable to offer a specific planting date for a specific lot. While garden styles are described, we reserve the right to substitute planting material where supply of nursery stock, or site conditions require such change.
